

Corporate Asset Maintenance & Service Management System

Overview

The **Corporate Asset Maintenance & Service Management System** is a no-code business application developed using **Zoho Creator** to automate the complete lifecycle of corporate asset maintenance.

The application enables organizations to efficiently manage assets, maintenance requests, approvals, repair progress, technicians, reports, and dashboards through a centralized system.

Problem Statement

Organizations often manage their assets manually, making it difficult to track maintenance history, repair costs, technician assignments, and asset status.

Common challenges include:

- Manual maintenance tracking
- Delayed approvals
- Lack of repair monitoring
- No centralized asset database
- Inefficient reporting
- Increased operational cost

This project addresses these challenges through workflow automation and centralized management.

Objectives

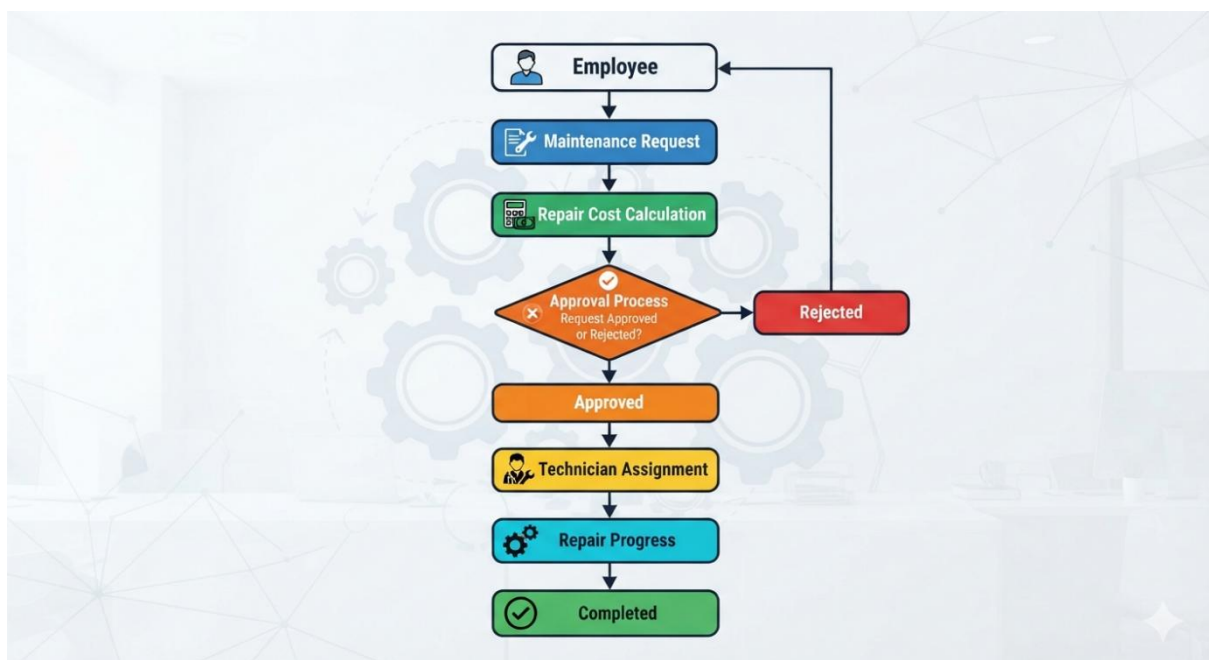

- Digitize corporate asset management
- Automate maintenance request processing
- Track repair activities
- Reduce manual work
- Improve approval workflow

- Generate business reports
- Provide real-time dashboards

Technologies Used

Technology	Purpose
Zoho Creator	No-Code Development
Deluge	Workflow Automation
Forms	Data Collection
Reports	Data Visualization
Dashboards	Business Analytics
Blueprint	Repair Workflow

System Architecture

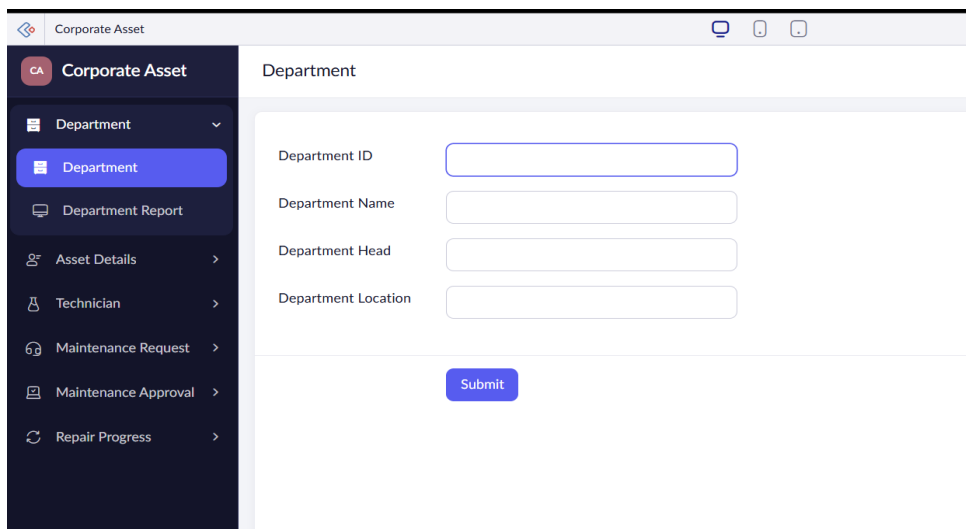

Modules

Department Management

Maintains department information including:

- Department ID
- Department Name
- Department Head
- Department Location

The screenshot displays a web application interface for 'Corporate Asset' management. On the left is a dark sidebar with a menu containing 'Department' (selected), 'Department Report', 'Asset Details', 'Technician', 'Maintenance Request', 'Maintenance Approval', and 'Repair Progress'. The main content area is titled 'Department' and contains a form with four input fields: 'Department ID', 'Department Name', 'Department Head', and 'Department Location'. A blue 'Submit' button is located at the bottom right of the form.

Asset Management

Stores asset information including:

- Asset Details
- Purchase Date
- Warranty
- Purchase Cost
- Asset Status
- Depreciation
- Current Asset Value

The screenshot displays the 'Corporate Asset' management interface. On the left is a dark sidebar with a menu containing: Department, Asset Details (selected), Asset Details Report, Technician, Maintenance Request, Maintenance Approval, and Repair Progress. The main area is titled 'Asset Details' and contains a form with the following fields: Asset Name (text input), Asset Category (dropdown), Asset Serial Number (text input), Purchase Date (date input: dd-MMM-yyyy), Warranty Expiry Date (date input: dd-MMM-yyyy), Purchase Cost (text input: ##,##,###.##), Department (dropdown), Asset Status (dropdown), Expected Life (text input: #####), Annual Maintenance Cost (text input: ##,##,###.##), Depreciation Percentage (text input: #####.##), and Current Asset Value (text input: ##,##,###.##). A 'Submit' button is located at the bottom right of the form. The top of the interface shows the 'Corporate Asset' title and a user profile 'K KEERTHANA ...'.

Technician Management

Maintains technician information.

Features

- Technician Registration
- Specialization
- Availability Status
- Experience

The screenshot displays the 'Corporate Asset' management interface for the 'Technician' section. The left sidebar menu is identical to the previous screenshot, but 'Technician' is now selected. The main area is titled 'Technician' and contains a form with the following fields: Technician Name (text input), Phone Number (input with a country code dropdown showing '+91' and a value '81234 56789'), Email (text input), Specialization (dropdown), Experience (text input: #####), and Availability Status (dropdown). A 'Submit' button is located at the bottom center of the form. The top of the interface shows the 'Corporate Asset' title and the same user profile 'K KEERTHANA ...'.

Maintenance Request

Employees can:

- Select Asset
- Raise Request
- Set Priority
- Enter Estimated Repair Cost
- Add Labour Charge

Workflow automatically calculates

- Total Cost
- GST
- Final Repair Cost

The screenshot shows a web application interface for 'Corporate Asset'. The left sidebar contains a navigation menu with the following items: 'Department', 'Asset Details', 'Technician', 'Maintenance Request' (expanded), 'Maintenance Request Report', 'Maintenance Approval', and 'Repair Progress'. The 'Maintenance Request' sub-menu is active, showing 'Maintenance Request' and 'Maintenance Request Report'. The main content area is titled 'Maintenance Request' and contains a form with the following fields:

Field	Input Type
Asset	Dropdown menu (currently shows '-Select-')
Requested By	Text input
Department	Dropdown menu (currently shows '-Select-')
Issue Category	Dropdown menu (currently shows '-Select-')
Issue Description	Text area
Priority	Dropdown menu (currently shows '-Select-')
Estimated Repair Cost	Text input (format: ##,##,###.##)
Labour Charge	Text input (format: ##,##,###.##)
Total Estimated Cost	Text input (format: ##,##,###.##)
GST Amount	Text input (format: ##,##,###.##)
Final Repair Cost	Text input (format: ##,##,###.##)
Request Date	Text input (format: dd-MMM-yyyy)

The bottom of the sidebar shows a user profile for 'KEERTHANA ...' with a notification icon.

Maintenance Approval

Manager can

- View Requests
- Approve
- Reject
- Add Comments

The screenshot shows a web application interface for 'Corporate Asset'. The top navigation bar includes a logo and the text 'Corporate Asset'. A dark sidebar on the left contains a menu with items: 'Department', 'Asset Details', 'Technician', 'Maintenance Request', 'Maintenance Approval' (highlighted with a dropdown arrow), 'Maintenance Approval Report', and 'Repair Progress'. The main content area is titled 'Maintenance Approval' and contains a form with the following fields: 'Maintenance Request' (a dropdown menu showing '-Select-'), 'Requested Amount' (a text input field with a placeholder '###,###,###.##'), 'Single Line' (a text input field), 'Approval Status' (a dropdown menu showing '-Select-'), 'Manager Comments' (a large text area), and 'Approval Date' (a text input field with a placeholder 'dd-MMM-yyyy'). A blue 'Submit' button is located at the bottom right of the form.

Repair Progress

Technician can

- Accept Repair
- Update Status
- Add Remarks
- Complete Repair

Workflow Automation

The application includes automated business logic.

Field Rules

Show Repair Cost fields only when

- Priority = High
- Priority = Critical

Show Issue Description only when

- Issue Category = Other

Deluge Automation

Automatically calculates

- Total Estimated Cost
- GST Amount (18%)
- Final Repair Cost

Automatically updates Maintenance Status

Cost	Status
< ₹5000	Repair Started
₹5000–₹10000	Assigned
> ₹10000	Waiting Approval

```
</> deluge

input.Total_Estimated_Cost = input.Estimated_Repair_Cost + input.Labour_Charge;

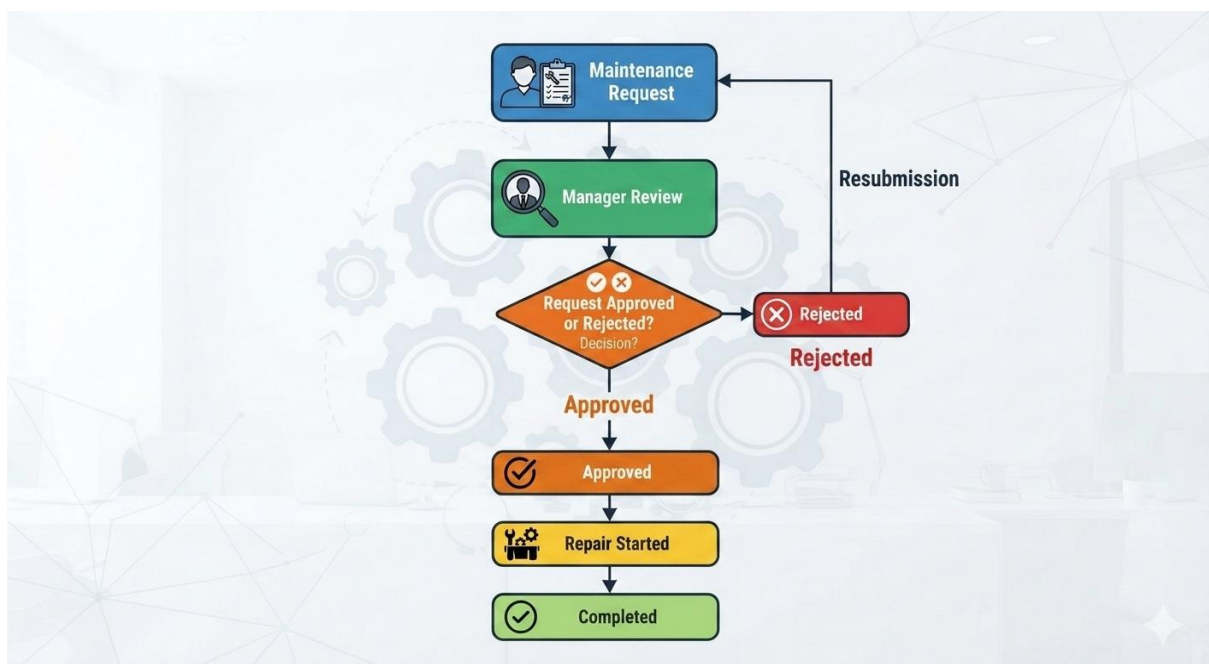

input.GST_Amount = input.Total_Estimated_Cost * 0.18;

input.Final_Repair_Cost = input.Total_Estimated_Cost + input.GST_Amount;

if(input.Final_Repair_Cost > 10000)
{
    input.Maintenance_Status = "Waiting Approval";
}
else if(input.Final_Repair_Cost >= 5000)
{
    input.Maintenance_Status = "Assigned";
}
else
{
    input.Maintenance_Status = "Repair Started";
}
```

Approval Workflow

Blueprint

Repair workflow stages

Reports

The application generates

- Assets Report
- Maintenance Requests
- Pending Approvals
- Completed Repairs
- Technician-wise Repairs
- Department-wise Assets

The screenshot shows the 'Corporate Asset' application interface. On the left is a sidebar menu with options: Department, Asset Details, Technician, Technician Report, Maintenance Request, Maintenance Approval, Repair Progress (selected), and Repair Progress Report. The main area is titled 'Repair Progress' and contains a form with the following fields: 'Maintenance Request' (dropdown menu), 'Technician' (dropdown menu), 'Repair Status' (dropdown menu), 'Repair Start Date' (date picker), 'Repair End Date' (date picker), and 'Remarks' (text area). A 'Submit' button is located at the bottom right of the form.

Dashboard

Dashboard includes

- Total Assets
- Total Requests
- Pending Approvals
- Completed Repairs
- Asset Summary
- Technician Summary
- Maintenance Summary

The screenshot displays a web application interface for 'Corporate Asset' management. The interface is divided into a dark sidebar on the left and a main content area on the right. The sidebar contains a menu with options: 'Department' (selected), 'Department Report', 'Asset Details', 'Technician', 'Maintenance Request', 'Maintenance Approval', and 'Repair Progress'. The main content area is titled 'Department' and contains a form with four input fields: 'Department ID' (with a cursor), 'Department Name', 'Department Head', and 'Department Location'. A blue 'Submit' button is located below the form. The top of the application shows a browser window with the title 'Corporate Asset' and standard window controls. The bottom of the sidebar shows a user profile for 'KEERTHANA ...' with a notification bell icon.

Features

- ✓ Department Management
- ✓ Asset Tracking
- ✓ Technician Management
- ✓ Maintenance Requests
- ✓ Approval Workflow
- ✓ Repair Tracking
- ✓ Workflow Automation
- ✓ Deluge Scripts
- ✓ Reports
- ✓ Dashboard

Skills Gained

During this project I gained practical experience in:

- Zoho Creator
- Deluge Scripting
- Workflow Automation
- No-Code Development
- Business Process Automation
- Dashboard Design
- Report Creation
- Requirement Analysis

Future Enhancements

- QR Code Asset Tracking
- Barcode Scanning
- AI Predictive Maintenance
- Mobile Application
- Email Notifications
- SMS Alerts
- Asset Analytics
- Inventory Management

Conclusion

The Corporate Asset Maintenance & Service Management System demonstrates how business operations can be automated using a no-code platform. The application improves efficiency, reduces manual effort, and provides better visibility into asset maintenance through workflows, reports, and dashboards.
